Who We Are?

IT GRUP was founded in 2000 and since then was involved in major local and regional projects for Downstream industry. We were the first company which develops and implements for Romania the unattended concepts in Downstream industry by certifying and implementing the first 18 Full unattended Petrol stations in Romania (AUTOMAT project).

wevo

Our History

A few years ago, we had the opportunity to open a line of business in Azerbaijan. The Azerbaijani company has 13 employees involved in opening business lines in this country. We have B2B eComm platform which written by our team. This tool helped one of our customers in Azerbaijan, Tobacco Distribution, to automate business sale and delivery process. Because the image of the products did not develop in the same rhythm as the products, we decided this year to reinvent ourselves, and the result is WEVO.

The logo for WEVO, featuring the letters 'w', 'e', 'v', and 'o' in a lowercase, sans-serif font. The 'e' is white, while the 'w', 'v', and 'o' are blue. The 'e' is positioned between the 'w' and 'v', and the 'o' is to the right of the 'v'.

Advantages our customer get

Greater efficiency

This is resulted from real time data access and easy communication across all departments. Therefore, problems are addressed immediately, turnarounds are managed with less efforts and downtimes are reduced.

Better asset utilization

When it comes to assets, maintenance is the key driver since unplanned downtime will hugely affect revenues. That is why a proactive maintenance approach is essential and starts with planning.

More features

WEVO is the best POS system for gas stations, because offers full control of pump operations right from the POS, pre-pay and post-pay capabilities. WEVO has and flexible price management, it is one of the most extensive petroleum-based POS systems.

Decreased costs

If you own, manage, or operate a busy gas station, you understand the need to automate, track, streamline, and track your inventory. Technology can now help gas stations to cut cost and reducing transaction times.

- **The right solution**, will help you to set different pricing by petroleum grade, manage your retail store, and manage back-office tasks
- **The right software** will assist to set price fluctuations, house account management, and compliance reporting.

Automate your fuel station with leading industry experts

Software integration is the process of combining diverse sub-systems to create one coherent, major multi-functional system. It can be said that with the advent of the internet and cloud platforms, software integration demand exploded.

Cost Savings

Increased productivity and efficiencies

Software integration will eliminate duplicate data entry, and the time for maintenance and upkeep will be reduced.

Time Savings

Software integration will eliminate duplicate data entry, and the time for maintenance and upkeep will be reduced.

Compliance
